

Remarks

The above changes as proposed to the specification do not alter or add to the structure as originally presented. The changes substantially comprise grammatical and numerical corrections. It is noted that receptors 47 previously not identified are now identified. Also, it is noted that fastening screws 24 and 26 were misidentified on pages 7, 8 and 9. The original drawings clearly support the corrections as made.

The Notice of Allowance indicated that claims 12-15, 17 and 19-29 were allowed.

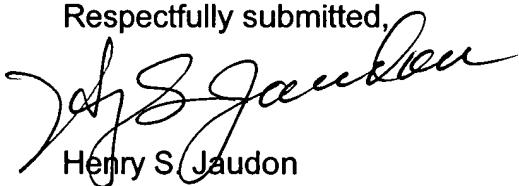

It is noted that claims 23-27 and 29 were inadvertently cancelled. Accordingly, these claims are herewith presented for entry to be allowed with the remainder of the allowed claims.

It is believed that the application is now in formal condition for allowance.

The drawing and specification have been amended to remove minor clerical errors. All claims now presented have been indicated allowable.

Accordingly, it is urged that the examiner enter the proposed amendment.

Respectfully submitted,

Henry S. Jaudon
